

Dear Readers!

After the relaunch of our website, we are happy to present the first AustriaTech newsletter in a new design as well!

The summer months are characterised by preparation and follow-up phases – various projects are running out and, moreover, autumn is hosting many events on a national and international level, for example the ITS World Congress in Singapore. You can expect news around the topics automated mobility, smart cities and multimodal transport systems.

Enjoy reading!

Best regards, Your AustriaTech Editorial-Team

Part of the Horizon Europe Mission Boards

The experts of the mission boards of Horizon Europe were announced and our managing director Martin Russ is part of the "Mission Board for Climate-Neutral and Smart Cities". The objective of the European research and innovation missions are to deliver solutions to some of the greatest challenges facing our world.

[read more](#)

"Tackling climate challenges within cities based on the integration of new technological possibilities, is my motivator number one. We have to align and create benefits out of overlapping key new market domains - like Automated Mobility, Mobility as a Service, Connectivity and Digital Infrastructures and Clean Transport."

DI Martin Russ
Managing Director of AustriaTech

Scaling Towards Sustainable Mobility

Working on different urban and regional scales and targeting various stakeholders requires to offer a wide range of co-creative methods. With this workshop within the [OpenLivingLab Days](#) (3.-5.9.) the Urban Mobility Labs want to show how challenges in mobility can be dealt with creatively on diverse spatial levels. For more information click on the button below.

Successfully implemented door-to-door routing

Since 2017, the EU-project LinkingDanube pursues the objective to work out a de-centralised approach for provisioning a cross-border travel information service. The technical feasibility of the door-to-door routing from the „linking services“ was tested and implemented successfully. The project has been completed successfully after 30 months at the end of June 2019.

You can read more about [LinkingDanube](#) online, download the [LinkingDanube Concept](#) or watch the new video to see how the "linking of services" works.

AEOLIX – The future of logistics data exchange

On 26th of June the AEOLIX final conference took place in Hamburg. The project enters its final month after a three-year long research on supply chain visibility and interoperability. AEOLIX was born from the aim to overcome today's fragmentation and lack of connectivity around ICT-based systems for logistics decision making.
