

AustriaTech-Newsletter, issue 10/18

Dear readers,

the users of our mobility system are becoming more and more a central issue. At this year's ITS Austria conference, the national mobility players reaffirmed their commitment to mobility as a service for users. The clear learning of the conference is that the way into the future of mobility can not be a solo effort. Cross-transport cooperation is the key to success. Also in several AustriaTech projects, cooperation, even across national borders, plays an important role. PRIO Austria, LinkingDanube and INFRAMIX are some of those projects, which you can find out more about in the newsletter.

We hope you enjoy reading this newsletter and wish you all the best,

Your smart-mobility-Team / AustriaTech

This was the ITS Austria Conference 2018

In recent years, the ITS Austria Conference has established as an important industry summit for national ITS stakeholders and infrastructure operators. At this year's conference, the current work programme and the first implementation measures were presented. [>>> more](#)
