

AustriaTech-newsletter, issue 7/18

Dear Readers,

Mobility defines our quality of life. The level of networked mobility services not only influences the CO² balance, but is also decisive for our mobility behaviour and thus for flexibility and comfort in our professional and private lives. It is therefore not surprising that this year's ITS World Congress in Copenhagen is intensively dedicated to this aspect. Austrian companies will once again be at the forefront this year, both in the exhibition and in numerous sessions. In our summer newsletter edition you will find even more examples of how projects such as the Urban Mobility Laboratories want to contribute to a better quality of life. In addition, two new publications on the topics of traffic telematics and information service provide sufficient reading material.

Enjoy reading!

Best regards, Your AustriaTech-Team

Austria's Stakeholders at the ITS World Congress in Copenhagen

Under the umbrella of ITS Austria, Austrian companies will once again be represented at the ITS World Congress 2018 in Copenhagen. On the first day of the event, we cordially invite you to the "Austrian Reception" at our joint stand (C2-062) at 5:30 pm. [>>> more](#)
