

Electromobility in Austria

Facts & Figures
September 2019

Highlights in September 2019

In September, 1,132 electric vehicles were newly registered in Austria and the stock has risen to 34,843. Compared to other federal states, Styria has a BEV share of 5.87% in new registrations. The Tesla Model 3 is the most popular BEV model with 387 new registrations in September 2019. In the comparison of brands Tesla leads with around 34% market share.

The monthly Facts & Figures-sheet offers a compact overview of current developments in the electromobility. As a federal agency, AustriaTech assumes the role of an expert organisation and prepares the data factually and neutrally.

Facts & Figures

Electromobility in Austria, September 2019

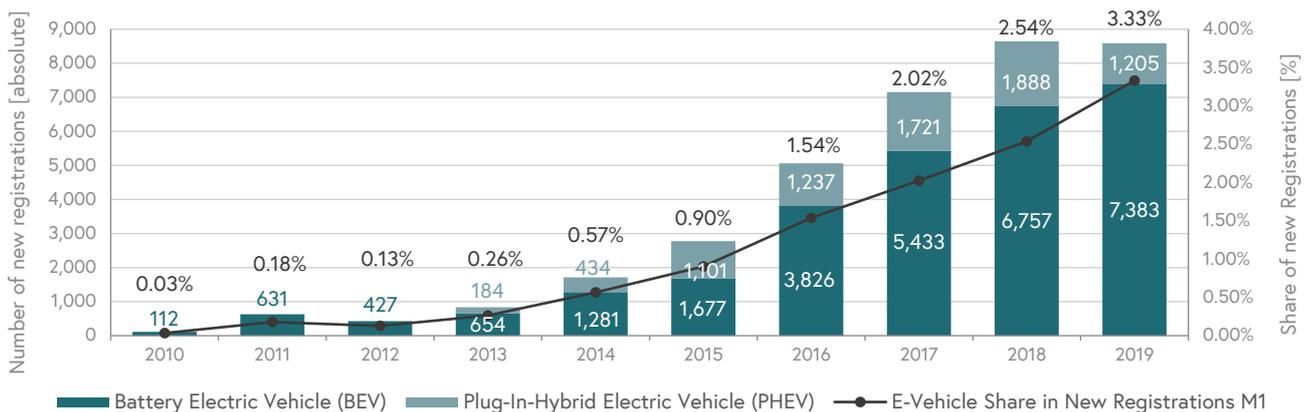

New registrations of e-vehicles of category M1 per month (for Austria)

In the comparative period since January 2016, there has been a steady upward trend in the newly registered e-vehicles. In September 2019, 969 BEV (+21% on the previous month), 162 PHEV (+57% on the previous month) and one FCEV (±0% on the previous month) were newly registered. The share of new registrations of e-vehicles in September 2019 was 5.38%.

New registrations of e-vehicles of category M1 by year (for Austria)

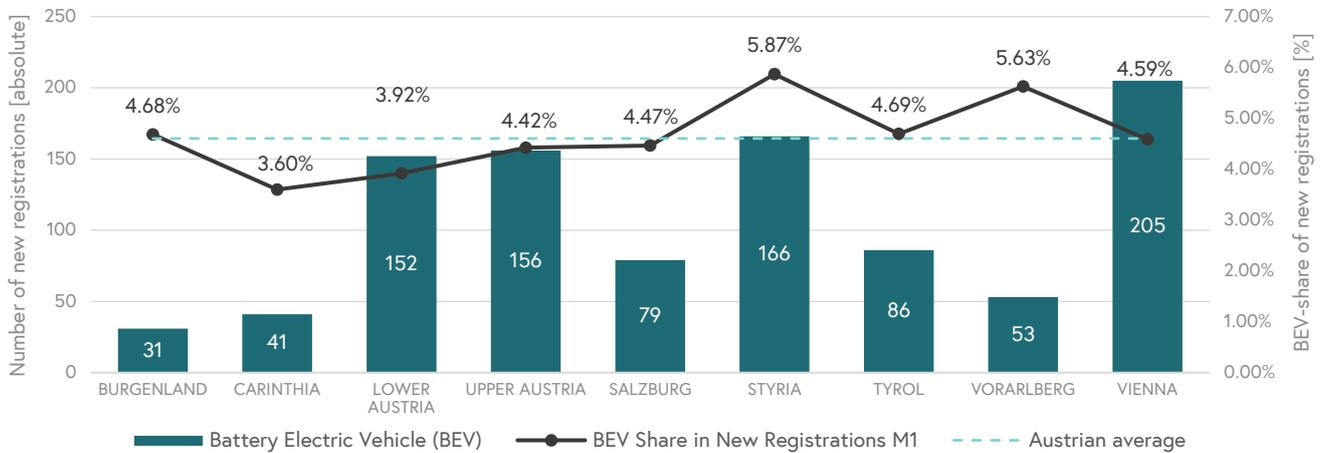

From January to September 2019, 7,383 BEV, 1,205 PHEV and 14 FCEV were newly registered. Compared to September 2018, new registrations of BEV increased by 75%, PHEV new registrations increased by 145% and FCEV registrations increased from zero to one unit. The e-vehicle share of category M1 registrations from January to September 2019 is 3.33%.

Facts & Figures

Electromobility in Austria, September 2019

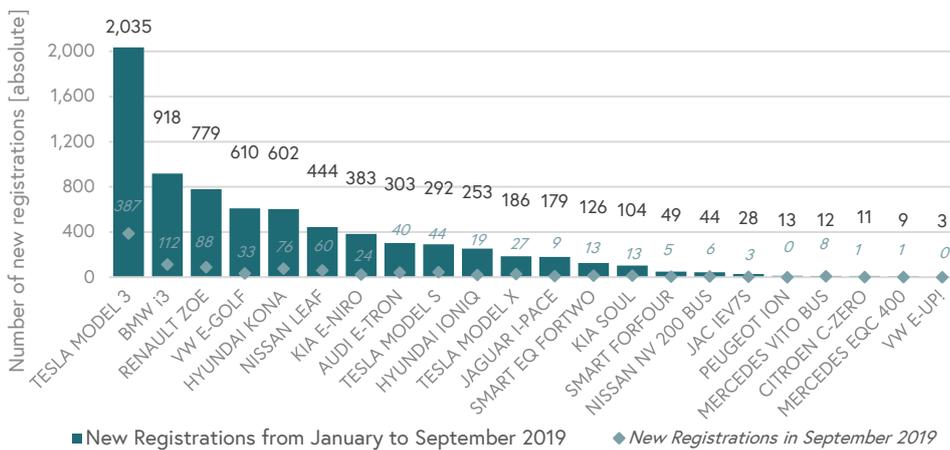

New registrations of BEV cars of category M1 by Austrian federal state (September 2019)

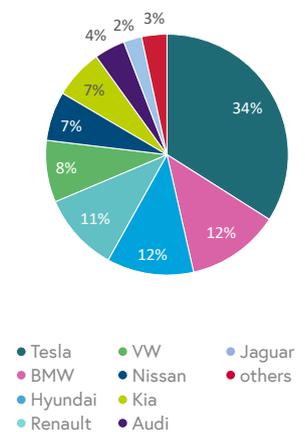

Compared with other Austrian federal states, Styria has the highest percentage of BEV in newly registered passenger cars at 5.87%, followed by Vorarlberg (5.63%) and Tyrol (4.69%). Austria has a BEV share of 4.60%. In the absolute number of newly registered BEV, Vienna is ahead with 205 e-cars, followed by Styria (166) and then Upper Austria (156).

New registrations of BEV cars of category M1 by model (cumulated until September 2019)

BEV market share 2019 (M1)

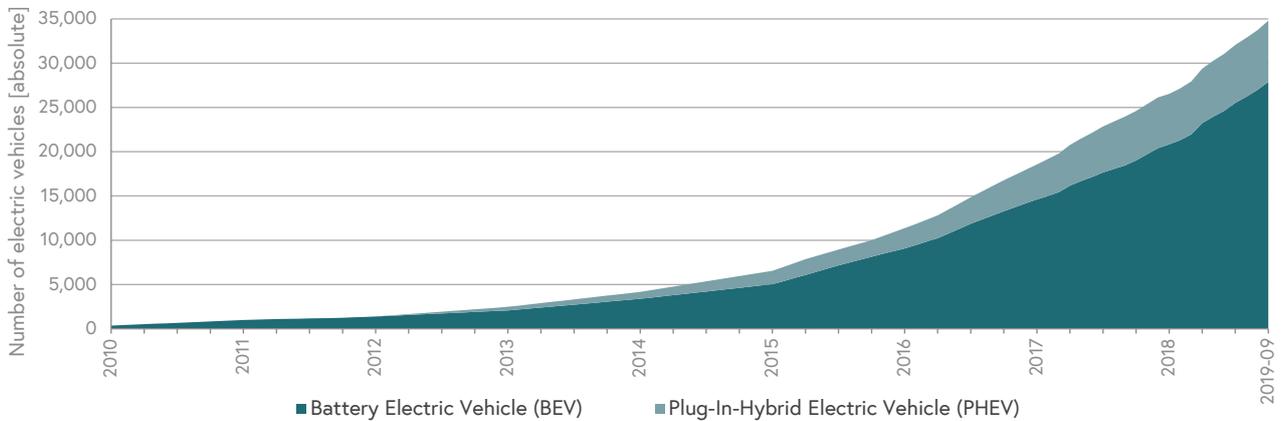

In the period from January to September 2019 the most popular model was the Tesla Model 3 with 2,035 units, followed by the BMW i3 with 918 units and the Renault Zoe with 779 units. The most popular model in September was the Tesla Model 3 with 387 units, followed by the BMW i3 with 112 units and the Renault Zoe with 88 units. In the market share of new registrations from January to September 2019, Tesla takes first place with around 34%, followed by BMW with around 12% then Hyundai with around 12%.

Facts & Figures

Electromobility in Austria, September 2019

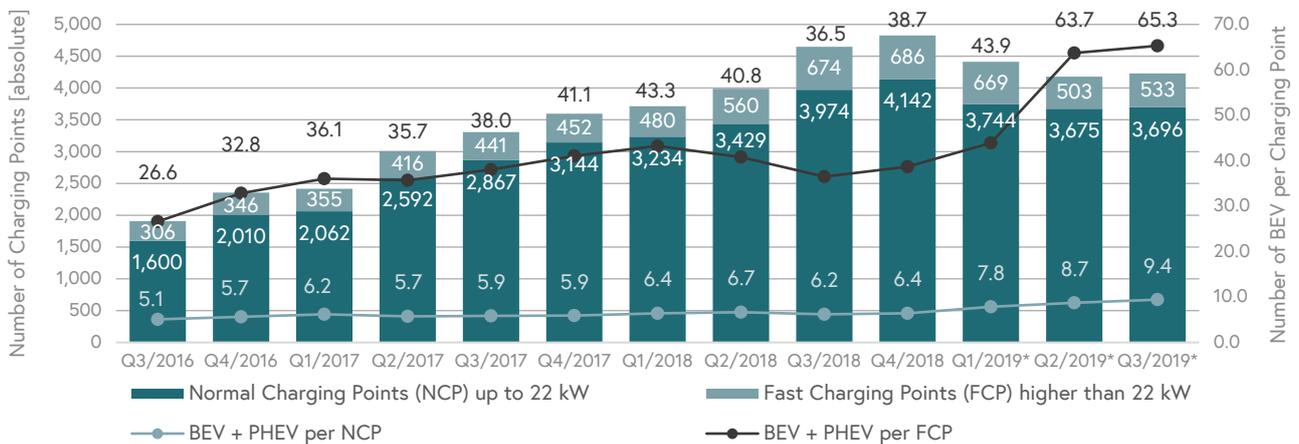

Population of e-vehicles of category M1 over time (for Austria)

While the number of battery electric vehicles rose moderately between 2010 and 2012 (approximately 1,400 in 2012), the number of electric vehicles has risen sharply since then, including in September 2019. As of the end of September 2019, 34,843 electric vehicles were on the roads of Austria, corresponding to a share of the total population of 0.69%.

Publicly accessible charging points in Austria

The figure shows publicly available normal and fast charging points according to Directive 2014/94/EU. In total there are 3,696 normal charging points and 533 fast charging points until the end of the third quarter of 2019. At this moment there are about nine electric cars (BEV and PHEV) on one NCP and about 65 on a FCP.

Source: <http://e-tankstellen-finder.com>; Data status: at the end of each quarter of the respective year; Illustration: AustriaTech

*Due to database adjustments, the number of charging points decreased since Q1/2019. This reduction was only in the underlying database, effectively the charging points did not decrease.

About AustriaTech

AustriaTech is a 100% subsidiary of the Federal Ministry of Transport, Innovation and Technology (BMVIT). It acts as an integrator in the field of mobility and supports the transformation processes towards an ecological, efficient and modern transport system. The activities range from new services and digital infrastructure to automated mobility. Electromobility activities include a continually monitoring and annual electromobility highlights, as well as participation in various working groups and supporting actions in ongoing activities such as subsidies, research programs, guidelines.
