➤ Welcome

OLÉ – Austria’s National Competence Center for E-Mobility, which is part of AustriaTech, supports and analyzes developments in the field of e-mobility. In this document, we provide insights into new registrations and vehicle populations as well as the publicly accessible charging infrastructure.

Every month, we provide information on the facts and figures of e-mobility in order to depict the dynamic developments in the electrification of mobility.

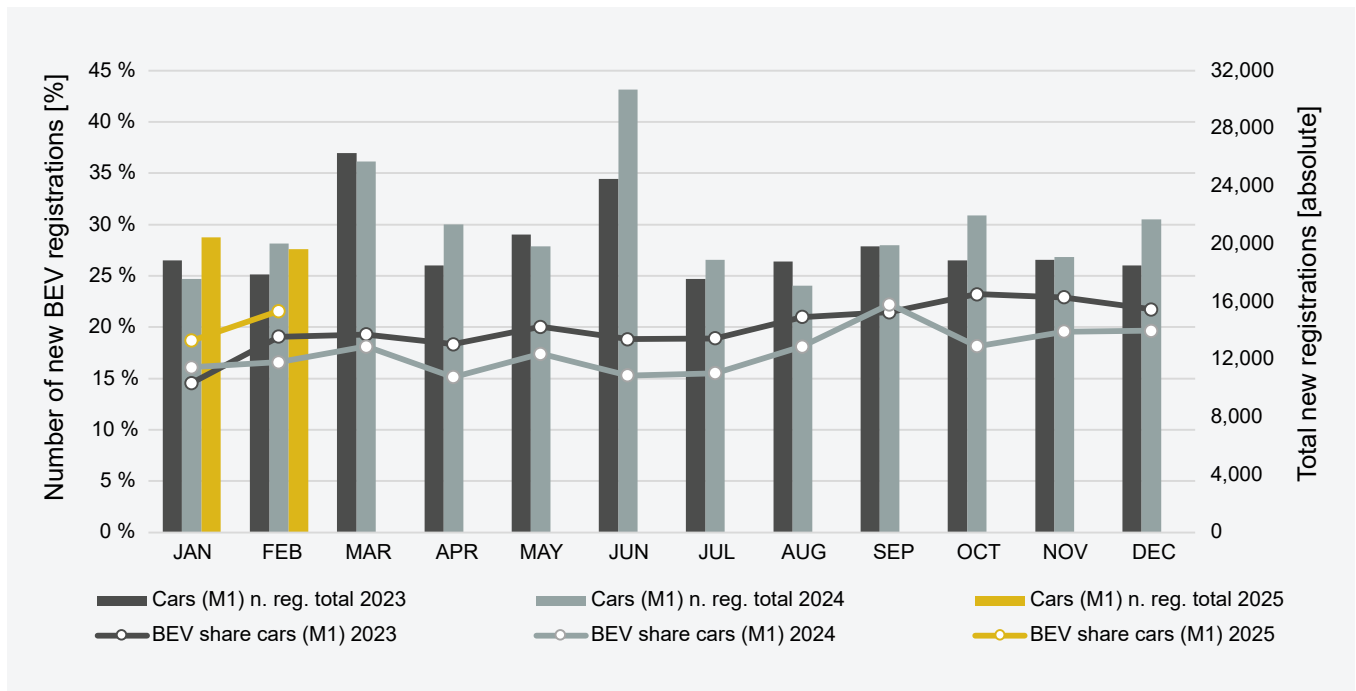

OLÉ - Austria’s National Competence Center for E-Mobility wishes a delightful discovery!

The chart contains the cumulative monthly new registration figures for the current year. For this purpose, the initial data from the reporting centres was aggregated and assigned to the districts, with Vienna representing the individual municipal districts of Vienna as a whole. Only the three reporting centres 'Bahn', 'Justizwache, Polizei, Zollwache' and 'Post' are not included.

The share of new registered BEV cars (M1) is particularly high along the agglomerations of urban centres such as Wels Land, Stadt Linz & Linz-Land, Graz Umgebung, St. Pölten Land and Eisenstadt Umgebung with at least 25 %. In contrast, the share of new BEV registrations in the centre of Austria is comparatively low at under 15 %.

Publicly accessible recharging points per federal state, February 2025

Source: E-Control, data cleansing by AustriaTech; Illustration: AustriaTech; Data status: 03/03/2025

Currently the Austrian recharging network consists of 21,062 normal recharging points, 4,526 fast recharging points and 2,077 ultra-fast recharging points, amounting to **27,665 publicly accessible recharging points** in total.

OLÉ - Austria's National Competence Center for E-Mobility supports the expansion of efficient recharging infrastructure in public spaces by improving framework conditions and funding programmes. OLÉ is committed to finding the right recharging infrastructure for the respective recharging scenario. To support the ramp-up, all forms of recharging infrastructure (e.g. smart home and workplace recharging points and high power recharging points on main routes) are needed.
